Deliverable leader	EFIS Centre
Authors	Matias Barberis (EFIS) and Lyudmyla Tautiyeva (EFIS)
Contributors	Luis Goñi (EFIS), Erica Gaudino (EFIS) and Dimitrios Kotsis (EFIS)
Case study authors	Matias Barberis (EFIS), Lyudmyla Tautiyeva (EFIS), Ugo Rizzo (UNIFE), Nicolò Barbieri (UNIFE), Christina Kakderi (AUTH), Maria Goulaptsi (AUTH).

This report examines how policies supporting the green, digital and twin transitions in the European Union (EU) shape inequalities across the policy cycle. It presents the findings of six case studies from EU Member States, identifying main drivers that reinforce or mitigate inequalities. It includes a meta-analysis of the case studies, identifying underpinning factors of inequalities as well as synergies of transition policies with broader policy areas that support mitigating the inequalities. The analysis also presents five inequality pathways and proposes policy actions to support more inclusive and equitable transition policies across Europe.

This project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101132559.
